Installing REST API Documentation on a Local Workstation

This procedure installs REST API documentation on a local workstation.

REST API is available for Release 2019 and greater. While the server installation of REST API installs the API documentation on the server, it is not accessible outside the firewall. This procedure lets you install a standalone version of the API site so you can access API documentation from your local workstation.

Enabling Web Server (IIS)

- 1. Open the Control Panel on your local workstation and search for Features.
- 2. Click Turn Windows features on or off.

| 🖭 feature - Control Par J | | | _ | × |
|--|-----|---------|---|---|
| ← → → ↑ 🖭 > Control Panel | ~ Ō | feature | | × |
| Programs and Features Turn Windows features on or off Intel® Graphics Settings | | | | |
| Search Windows Help and Support for "feature" | | | | |

3. Select Internet Information Services, and then click Ok. Windows installs the IIS feature.

Installing REST API Locally

1. Extract the content from the REST.Docs zip file to your local workstation in the following location:

C:\API\2021

| File Home Share Preview pane Navigation Details pane | View Extra large icons Medium icons B List | Small icons Details | | Sort | ☐ Item check boxe ☑ File name extent ☐ Hidden items | |
|---|---|------------------------|------|--------------|---|--|
| Panes | 1 | Layout | | Current view | Show/t | |
| ← → ~ ↑ 🦲 > Thi | s PC > Local Disk (C |) > | | | ~ 0 | |
| Name | | Date modified | Тур | e | Size | |
| api-doc | | 1/28/2020 12:43 PM | File | folder | | |
| index.html | | 1/28/2020 4:38 PM | HT | ML Document | 1 KB | |
| Web.config | | 1/28/2020 12:48 PM | COL | NFIG File | 1 KB | |

2. Open IIS and add a virtual directory. Provide an Alias and the actual path where you extracted the zip contents, and click OK

| Connections | | Defe | | ala Cit |
|--|----------|------|--------|---------|
| Q 🔜 🖄 😣 | e | Defa | ault W | ed Site |
| W-19-S01 (W-19-S01\Administrator) | Filter: | | | • 3 |
